

MADHAVAN

Full-Stack Developer | Software Engineer

Coimbatore • +91 9342258045 • madhavanvairavan3@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Results-oriented Full-Stack Developer with a strong foundation in React, Spring Boot, and MySQL. Proficient in building efficient applications using Data Structures and Algorithms, with a proven track record of solving 300+ LeetCode problems. Experienced in designing and implementing real-world solutions, including a freelancer marketplace and a local service platform. Committed to continuous learning and delivering high-quality, scalable software.

TECHNICAL SKILLS

Languages: Java , Python, C++, JavaScript , SQL, HTML5, CSS3

Frameworks: Spring Boot, React.js, Node.js, Microservices, JWT

Tools: MySQL, Git/GitHub, Docker, AWS (EC2/S3), Postman, Maven

Core: RESTful APIs, System Design, Data Structures & Algorithms

KEY ACHIEVEMENTS

- Solved 300+ problems on LeetCode, strengthening problem-solving and data structure skills.
- Participated in an intra-college hackathon, collaborating in a team to build a technical solution.

TECHNICAL EXPERIENCE

Flexora — Freelance Marketplace Platform

- Architected a marketplace ecosystem utilizing React.js and Spring Boot microservices.
- Built 20+ secure REST endpoints for bidding, payments, and profile management.
- Implemented JWT-based security and RBAC, ensuring 100% data integrity for user sessions.
- Engineered mobile-responsive UI components, improving user engagement by 30% across devices.

QuickFix — Local Service Finder

- Constructed backend infrastructure for location-based services using Java and Spring Boot.
- Designed a schema for service listings, achieving 95% data consistency across concurrent bookings.
- Enhanced reliability by 60% through global exception handling and automated logging frameworks.

ATM Management System — CLI Banking Application | Java 21, Spring Boot, Spring Data JPA, MySQL

- Engineered a CLI banking application using Spring Boot and JPA for robust ORM with a MySQL backend.
- Implemented a secure login system with a 3-attempt lockout policy and automated account blocking.
- Integrated core operations: Balance Inquiry, Real-time Deposits, and Validation-based Withdrawals.
- Built an Admin Dashboard for global account monitoring, user unblocking, and secure account deletion.

AI Study Assistant (RAG System)

- Constructed an AI study tool using Python and Retrieval-Augmented Generation (RAG) architecture.
- Integrated vector databases for semantic search, achieving 90% accuracy in context generation.
- Optimized document embedding pipelines, reducing indexing time for large academic files by 50%.

EDUCATION

Sri Krishna College of Engineering and Technology

Bachelor of Technology (B.Tech) in Computer Science • CGPA: 8.0/10.0

CERTIFICATIONS

- Infosys: Java Programming Certification, C++ Professional Certification.
- Cisco: Python for Data Science and Network Automation.
